I would like you to answer the following questions in a short answer format using Markdown.

Turn all of the questions below into headers.

If the questions are related, make the headers reflect this by subordinating them.

1. For questions that ask for a list, use the appropriate Markdown syntax to create either ordered or unordered lists.

2. Use **bold** and *italic* text for emphasis in your responses.

- GitHub Username: rabbasi2
- Team name: #1
- Today's date: 07-06-16

What tools have you we worked with so far in this class?

- Github
- CodeAnywhere
- Markdown
- Jekyll
- HTML

- CSS

Which have you found most potentially useful?

Pandoc is the most useful

Why?

Becasue it makes converting files easy. You can go from one type of file to another with in minutes.

What tools have been the most difficult to learn?

- GitHub

Why have they been particularly difficult to learn and use?

I don't think its diffcult to learn. It might be diffuclt to use, but we haven't spend a lot time learning github. GitHub will be wasy to use if we spend more time on it.

What tools would you like to learn more about?

I would like to learn more about github.

When you are finished with the questions in file:

1. I want you to change the name of the file to your GitHub username.
2. You will then work as a group to convert the file to HTML, DOCX, and ODT formats, per the instructions in class.
3. Then I want you to add, commit, and push your changes.
4. Finally, you will create a pull request in GitHub to get these files back into my original repository.
